

DaTARIUS

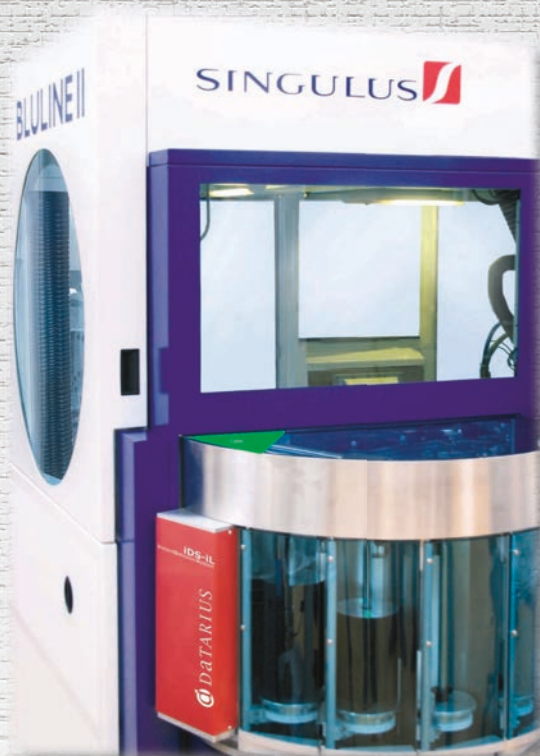

IDS-iL CD/DVD/BD
inline Instant Detection System

SMART-FAST-ECONOMICAL

instant detection
of playability
issues on
CD/DVD/BD

Incl. 10 inch
touch screen
for individual attachment
to the SINGULUS line

Full integration into
SINGULUS SKYLINE II
SPACELINE II
BLULINE

IDS-iL CD/DVD/BD

inline **i**nstant **D**etection **S**ystem
for **SINGULUS SKYLINE II, SPACELINE II and BLULINE**

NEW!

with **ASY** and
Modulation
measurement

Your Benefits:

- Quick and easy installation into your existing SINGULUS SKYLINE II, SPACELINE II or BLULINE
- Fully integrated hardware and software
- User-friendly implementation and operation
- Constant workflow and stress reduction due to automatic testing
- Easy-to-handle quality assurance
- Increased efficiency, less waste
- CD up to 48x, DVD up to 16x, BD up to 8x

BD iDS-iL – Item No. ANA00110

CD/DVD/BD iDS-iL inline instantDetectionSystem

The new innovative solution from DaTARIUS™ is based on a specially selected and modified CD/DVD/BD drive, with associated hardware and software. The device was developed in cooperation with SINGULUS TECHNOLOGIES to be fully integrated into the SINGULUS SKYLINE II, SPACELINE II or BLULINE.

The focus of this product is to help manufacturers of optical media to react fast on playability issues and to save costs!

Supported Formats:	BD-ROM - SL/DL DVD-ROM - SL/DL DVD-RAM - SL/DL CD-ROM	BD-R / BD-RE - SL/DL DVD-R / DVD+R - SL/DL DVD-RW / DVD+RW - SL/DL CD-R / CD-RW
