

## **DaTARIUS hosts the DVD Forum VPC Verification Seminar in conjunction with DaTARIUS's BLUE DAYS**

DaTARIUS is once more proud to play host, at its Austrian headquarters, to the DVD Forum's Verification Seminar. The Forum's VPC Committee will have its European meeting on the 14th of September. Registration and Information are available under the DVD Forum website <http://www.dvdforum.org/format-vtf.htm>.

The major themes of the Seminar are Format Verification for DVD/HD DVD test specifications and HD DVD Format/Logo Licence.

Cut through the mystique and learn about the challenges and solutions for manufacturing high definition optical media at the DaTARIUS 'Blue Days' technical seminar.

In conjunction with the VPC meeting, the DaTARIUS Group will be inviting top companies (DCA, Oerlikon, Singulus, Singulus Mastering, Technotrans,...) from within the optical media manufacturing industry to the Blue Days (September 12-13) at the company's headquarters in Reutte, Austria.

"This seminar will provide comprehensive information for anyone involved in the manufacture of HD DVD and BD," says DaTARIUS CCO Thomas Hackl. "In addition to a special keynote session, experts from throughout the industry will be offering technical insights along with market information and projections."

Sessions will cover every stage of optical manufacture and fulfilment: mastering, electroforming, replication, quality control, packaging and printing. DaTARIUS will explain in detail the measurements required for blue format spec conform discs and guide attendees through the quality control process: how it relates to the manufacturing flow, and how replicators can get perfect product to their customers.

DaTARIUS will also present and demonstrate its CoverTest™ Technology enabling Stamper Testing for all type of Stamper, (DVD, HD DVD and BD). The CoverTest™ foil enables stamper testing on driveCubes and reaches the closest correlation between stamper and disc. It also protects the stampers during handling.

In addition, there will be a detailed presentation of the DaTARIUS Blue format products and a showcase of its DaTABANK with driveCubes™ for BD, HD DVD and DVD.

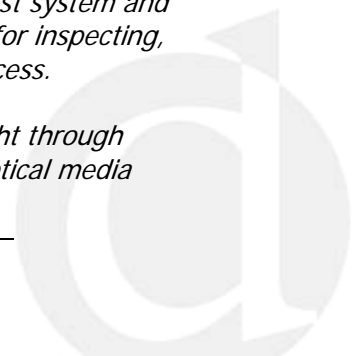

Attendees at the Blue Days seminars will be given 'live' demonstrations of Blue laser technology and testing solutions.

Registration is required for attendance at this event. Please contact your DaTARIUS Sales contact or register online @ [www.datarius.com](http://www.datarius.com)

### ***About DaTARIUS Technologies GmbH***

*The DaTARIUS Group is a global company focused on providing solutions throughout the optical media manufacturing industries. DaTARIUS developed the first commercial CD test system and has over 20 years' experience in the manufacture and distribution of equipment for inspecting, measuring and optimizing at every stage of the optical media manufacturing process.*

*DaTARIUS is unique in providing equipment for the entire production process right through from pre-mastering to print and packaging. Its products are suitable for every optical media*

*format – pre-recorded and recordable – from CD & DVD through to the new blue laser BD and HD DVD formats, and other emerging formats such as HD VMD.*

*In addition, DaTARIUS also develops and supplies process optimization equipment, such as sprue recycling and mould temperature regulations systems. This broad product range is supplemented by consulting and training services.*

*Beyond optical media, DaTARIUS, in partnership with InPhase, is developing quality control equipment for the next generation of holographic formats.*

*With headquarters in Reutte, Austria (R&D, sales and service), and regional offices in America Germany, Japan, China and Hong Kong, the DaTARIUS Group has a global team of 100-plus employees and partners with an extensive sales and service support network covering every major market of the globe: North America, South America, Europe, the Middle East, and the Pacific Rim.*
