Discontinuation of SDP-1000/ SDP-2000/ SDP-2000R Production and Final Order

Thank you for continuing business with us.

We would like to inform you the discontinuation of DVD Media Testing Drive: SDP-1000/SDP-2000/SDP-2000R. Also, Pulstec would like to ask you to confirm the volume of final order internally and to inform it to Pulstec.

We appreciate for all the efforts to establish SDP drive as the reference test player in the industry throughout the years.

Starting from the previous years, the market of DVD Disc Tester has encountered the weak demand caused by low media market price and media production adjustment. Unfortunately, Pulstec had to stop the production line of SDP in the meantime due to its low sales and the weak demand which is also led to the impossibility of operating mass production.

On the other hand, Pulstec is planning to shift the current DVD production line toward the next generation format product gradually.

Therefore, we are to produce all the SDP drives in the year, 2006, based on the final order. The delivery itself will be considered for the requested basis per certain minimum unit. For more details, please refer to the conditions below.

Sincerely yours,

- | | |
|--|-------------------------------|
| 1.Object Product | SDP-1000/ SDP-2000/ SDP-2000R |
| 2.Dead Line of Final Order | End of January, 2006. |
