International interest for the “Review on Optical Disc Market 2011”-event at Singulus Technologies

Dr.-Ing. Stefan Rinck, CEO from Singulus Technologies was pleased to welcome over 100 guests from 23 countries from all over the world to the “Review on Optical Disc Market 2011”-event at Singulus Technologies. The event took place at the Singulus Technologies location in Kahl/Main in Germany on November 29th, 2011. Presentations of various speakers gave an overview on the optical media market 2011 and an outlook for the coming years. The current state, trends and progress in the Blu-ray market predict a growth for the following years. Sylvia Hitzel, VP Sales & Marketing/Singulus Technologies rated the event very highly: “We were very pleased that so many disc producers followed our invitation. With Datarius, one of our important partners in the Optical Disc market launched its new DaTARIUS™iDS-iL inline instantDetectionSystem”.

DaTARIUS™iDS-iL inline instantDetectionSystem product launch

Dipl.-Ing. Stephan Hotz, Head of Product Management Optical Disc at Singulus Technologies presented the newly released DaTARIUS™ inline instantDetectionSystem in his speech.

During the company tour, in separate meetings and hands-on presentations the event guests could convince themselves of the benefits the DaTARIUS™ inline iDS can give to an Optical Media producer.

„The device was developed to be integrated in SINGULUS Skyline II, Spaceline II and Bluline. This enables fast and precise testing for all kind of optical media during the process of manufacturing.” Thomas Hackl, CEO of DaTARIUS GmbH in Reutte, Austria is convinced.

The integrated instantDetectionSystem checks the discs with high-speed: CD up to 48x, DVD up to 16x and Blu-ray up to 8x. The system offers adjustable measurement strategies and tests of BLER, E32, FE, TE and Jitter on CDs, PIE, PIF, FE, TE and Jitter on DVDs and LDCK, BIS, FE,

TE and Jitter on BDs. There is a direct connection to the line's operating panel to follow the quality from the same place where the line is controlled. An interface to DaTARIUS and AudioDev reference systems will also be established soon.

„I am very pleased with the work of our R&D team. To develop a device like the DaTARIUS™ inline iDS within less than 10 months is a marvellous achievement.“ says Thomas Hackl. „This was only possible with the great support and cooperation of the Singulus R&D team. We are entering a new dimension of quality control and cost saving

for all optical media.“ Hackl is certain. „The positive customer feedback at the Singulus event motivates us to continue searching for innovative solutions in order to support the Optical Media manufacturers with time-adequate quality control equipment.“

About DaTARIUS GmbH

DaTARIUS is a global company focused on providing solutions throughout the optical media manufacturing industries. DaTARIUS developed the first commercial CD test system and has over 25 years experience in the manufacture and distribution of equipment for inspecting, measuring and optimizing at every stage of the optical media manufacturing process.

With headquarters in Reutte, Austria (R&D, sales and service), and regional offices in USA, China and Hong Kong, DaTARIUS has a global team of employees and partners with an extensive sales and service support network covering every major market of the globe: North America, South America, Europe, the Middle East- and the Pacific Rim.
